DIGITAL BROADCASTING Workshop

Surabaya, 26-27 Sept 2017

IES INTERNATIONAL ELECTRONICS ... SYMPOSIUM 2017

Learn and Share the Digital Broadcast Technologies

This year IES-2017 Digital Broadcasting Workshop will address how broadcasters could secure spectrum for future broadcasting by enabling changes smartly while making use of latest opportunities emerged due to Over-The-Top (OTT) and Integrated Broadband Broadcast (IBB) services. The various sessions of the workshop will address issues relating to the diversity of media audience, UHDTV new delivery mechanisms and future transmission technologies, among others.
